CAREER OBJECTIVE

Motivated software developer with solid skills in Python, Flask, JavaScript, and full-stack fundamentals. Focused on writing clean code, building functional projects, and solving real problems with speed and clarity. Seeking an engineering role where I can contribute from day one, learn fast, and deliver work that actually moves the product forward.

SUMMARY

Computer Science graduate with real project experience in Python, Java, Django, REST APIs, and full-stack development. Built and deployed practical applications using clean architecture, solid debugging, and fast execution. Comfortable with machine learning fundamentals, software testing, and developing scalable, real-time features. Brings analytical thinking, ownership, and the ability to work in fast-moving teams.

TECHNICAL SKILLS

Programming	Python, JavaScript, HTML, CSS, Java
Frameworks	Django, React.js, Bootstrap, Streamlit
Databases	MySQL, MongoDB
Tools	Git, GitHub, Jupyter Notebook, REST API
Soft Skills	Problem-solving, Communication, Teamwork, Adaptability

EXPERIENCE

Full Stack Python Developer Intern – Naresh IT Technologies (2025)

Worked on end-to-end development using Django, REST APIs, React.js, MySQL, and MongoDB. Built and deployed live modules, optimized backend logic, and integrated front-end components for real-time features. Collaborated through GitHub, performed code reviews, and delivered tasks with fast turnaround and clean execution.

Java Full Stack Intern – Elite Solutions (2024)

Completed hands-on training in Java full-stack development, backend logic, and real-time project implementation. Built functional modules, practiced clean coding, and gained practical exposure to full-stack workflows while collaborating on college-level industry projects.

Machine Learning Intern – Appleton Innovations (2023)

Developed and tested ML models with a focus on data preprocessing, feature engineering, model training, and performance evaluation. Worked on real datasets, built reproducible pipelines, and delivered insights that improved model accuracy and reliability.

EDUCATION

B.Tech (CSE) – Welfare Institute of Science Technology & Management (2021–2025), GPA: 6.8

Intermediate (MPC) – Yalamarty Junior College (2019–2021), GPA: 5.1

SSC – Swarna Bharathi EM School (2019), GPA: 6.7

PROJECTS

FINANCIAL FRAUD DETECTION USING EXPLAINABLE AI (XAI) & FEDERATED LEARNING (FL)

- Built a fraud detection system using Python, applying XAI and Federated Learning concepts for transparency and privacy.
- Implemented ML models like Random Forest and Gradient Boosting on the PaySim1 dataset to achieve strong accuracy.
- Designed end-to-end data pipelines using NumPy, Pandas, and SQL for preprocessing and analysis.
- Developed a Streamlit-based dashboard to visualize fraud patterns and model explanations.
- Collaborated in a 5-member team, handling model development, testing, and integration.

Tech Stack: Python, NumPy, Pandas, Scikit-Learn, SQL, Streamlit, Matplotlib/Seaborn

E-Commerce Aggregator Application

- Built a full-stack platform that aggregates products from multiple e-commerce websites.
- Implemented smart filtering, accurate search, and a clean, user-friendly interface.
- Developed the backend using Python, Django, and REST APIs for fast and reliable data handling.
- Integrated a responsive front end and ensured smooth navigation across devices.
- Optimized API performance to deliver quicker results and a better overall user experience.

Agro-Farm Development Project

- Built a web-based platform to support farm modernization and crop optimization.
- Developed the front end using HTML, CSS, JavaScript, React.js, and Bootstrap.
- Designed a clean, responsive UI with smooth user interactions for better usability.
- Implemented modules for crop insights, automation workflows, and quick data access.
- Focused on performance, clarity, and user-centered features to improve decision-making for farmers.

Travel & Tourism Application – Smart India Hackathon (2023)

- Built a responsive travel and tourism platform using HTML, CSS, JavaScript, and React.js.
- Developed features for destination browsing, trip planning, and booking workflows.
- Designed a clean, intuitive UI with smooth navigation and mobile-friendly layouts.
- Improved user experience with fast loading, organized filters, and interactive components.
- Contributed to team-based development for the Smart India Hackathon, delivering functional modules under tight timelines.

CERTIFICATIONS

- Full Stack Python Developer – Naresh IT Technologies •
- Java Full Stack Development – Elite Solutions •
- Machine Learning Training – Appleton Innovations

ACHIEVEMENTS

- Selected and participated in Smart India Hackathon 2023, contributing to a functional travel-tech solution.
- Built multiple full-stack, ML, and real-time applications, showcasing end-to-end development capability.
- Strong academic performer with a consistent record of applying concepts to practical, outcome-driven projects.

STRENGTHS

- Quick Learner
- Team Collaboration
- Leadership Ability
- Time Management
- Creative Problem Solving

HOBBIES

Coding, Learning New Technologies, Music, Travel

LANGUAGES

English, Telugu

DECLARATION

Declaration

I affirm that the details provided in this resume are true, accurate, and presented to the best of my knowledge and belief.
