CAREER OBJECTIVE

To obtain a challenging software development position where I can apply my technical skills, problem-solving abilities, and passion for programming to contribute to organizational growth while enhancing my professional experience.

SUMMARY

Computer Science graduate with experience in Python, Java, Django, REST API, JavaScript, and full-stack development. Hands-on experience in machine learning, software testing, and building real-time applications. Strong analytical, teamwork, and communication skills with a drive to create scalable and efficient solutions.

TECHNICAL SKILLS

Programming	Python, JavaScript, HTML, CSS, Java
Frameworks	Django, React.js, Bootstrap, Streamlit
Databases	MySQL, MongoDB
Tools	Git, GitHub, Jupyter Notebook, REST API
Soft Skills	Problem-solving, Communication, Teamwork, Adaptability

EXPERIENCE

Full Stack Python Developer Intern – Naresh IT Technologies (2025)

Worked on full-stack development using Django, REST API, React.js, MySQL, and MongoDB. Built live projects and collaborated using GitHub.

Java Full Stack Intern – Elite Solutions (2024)

Completed training in Java full-stack development, backend logic, and real-time project implementation.

Machine Learning Intern – Appleton Innovations (2023)

Worked on real-world ML models, preprocessing, training, and evaluating performance metrics.

Software Testing Intern – Color Moon Technologies

Performed manual testing, UI validation, functional checks, and defect documentation.

EDUCATION

B.Tech (CSE) – Welfare Institute of Science Technology & Management (2021–2025), GPA: 6.8

Intermediate (MPC) – Yalamarty Junior College (2019–2021), GPA: 5.1

SSC – Swarna Bharathi EM School (2019), GPA: 6.7

PROJECTS

Digital Wallet (Paytm Clone) – 2025

A MERN-based digital wallet application using Node.js and Express.js for backend transactions and authentication, React.js for the frontend interface, and MongoDB for secure data storage. Supports fund transfers and user account management.

Diabetes Prediction – 2024

Developed a diabetes prediction platform using Django for the web interface, Python and SQL for data processing, Jupyter Notebook for model analysis, and Power BI for visual analytics.

Implementation of Personal Fitness Tracker using Python

A Python-based fitness tracker system aligning with corporate CSR goals, integrating SAP for HR and sustainability, with Python handling analytics, progress tracking, and data processing.

Financial Fraud Detection Using XAI & Federated Learning

Developed ML fraud detection model using Python, TensorFlow, Scikit-Learn, and Streamlit. Used Explainable AI and Federated Learning for privacy-focused prediction.

Travel & Tourism Application – Smart India Hackathon (2023)

Created responsive travel platform using HTML, CSS, JavaScript, React.js with booking and navigation features.

E-Commerce Aggregator Application

Built a platform combining services from multiple e-commerce websites, focusing on filtering and user experience.

Agro-Farm Development Project

Led farming modernization project using automation, crop optimization, and sustainable farming techniques.

CERTIFICATIONS

- Full Stack Python Developer – Naresh IT Technologies
- Java Full Stack Development – Elite Solutions
- Machine Learning Training – Appleton Innovations
- Software Testing Internship – Color Moon Technologies

ACHIEVEMENTS

- Participated in Smart India Hackathon 2023
- Built multiple full-stack and ML projects
- Consistent academic performer with practical knowledge

STRENGTHS

- Quick Learner
- Team Collaboration
- Leadership Ability
- Time Management
- Creative Problem Solving

HOBBIES

Coding, Learning New Technologies, Music, Travel

LANGUAGES

English, Telugu

DECLARATION

I hereby declare that all the information provided is true and correct to the best of my knowledge.
